

Insect Screen

Sun Guard

Protection from harmful sun damage while controlling cooling costs

Product Overview

A fiberglass screen that is crafted to block up to 75% of the sun's rays entering a building. Reduces air conditioning costs and prevents fading of furniture and carpets indoors. Perfect for exposed patios, decks, sliding doors, and windows. Available in charcoal color.

Benefits

- Extremely tight fiberglass weave for greater protection from sun and insects
- Light filtering for greater heat reduction and less glare
- Long-lasting, attractive exterior appearance while providing increased interior privacy
- Durable PVC coated polyester screen mesh creates a long-lasting window screen that you can enjoy for years
