

FibaLath™

Fiberglass alternative to metal lath

Attaches like metal lath and meets IBC and IRC building code requirements

Introducing FibaLath™, the fiberglass alternative to metal lath

ADFORS FibaLath is an innovative fiberglass lath designed for use in stucco applications, and exterior/interior walls of manufactured stone and brick façades. The three dimensional profile of FibaLath is self-furring and is attached the same way as metal lath.

Additional Features & Benefits include:

- Alkali-resistant for long term performance. Will not rust or rot.
- Non-directional which means it can be applied vertically or horizontally
- Over 4 times lighter weight than metal lath (per unit area)
